Mi Performance Guarantees 100% framework and project KPI compliance. The answer to the Playbook

Mi Performance enables truly digital, end to end KPI management – from data capture and validation to submission. Specifically designed for the built environment with pre configured industry standard templates and fully customisable goals.

Main Contractors can use the platform to drive standardisation and attain enterprise wide project insight.

Framework providers can eliminate duplicate submissions, ensuring 100% against contractual terms and undercover previously undiscovered insight.

Asset Owners can use platform to drive consistency and optimise deliver across their portfolio. All with analytical insight geared towards driving continuous improvement and value for money.

"It makes KPI compliance much simpler, ensuring we capture the right data at the right time, even framework reports - so a win-win for us, SCAPE and our clients"

Nick Abbey
Framework Director

Platform Benefits

- **A single simple to use solution removing administrative burden, from duplication saving time and money**

- **Structured KPI measurement and reporting ensuring consistency across projects optimising ways of working**

- **100% validation of measures providing total governance, reducing risk of errors and increasing stakeholder confidence**

- **Differentiated approach from competitors in work winning by offering an improved customer experience and total transparency**

- **Data insights provide opportunities to benchmark, optimise process and drive continuous improvement**

- **Capture every asset of project delivery not just those requested by the client**

Mi PROJECT SOLUTiONS

Features

Frameworks Templates

Pre configured major framework compliant templates can be turned as required ensure standardisation across projects. Including Scape, SCF, Pagabo, Procurement Hub, DFE, CCS. YorBuild2, NEPO, Procure Partnerships. Home England, LHC, ESFA, NHS Wales.

Approval & Validation

Configurable system rules ensure that data captured and associated any evidence can be approved before being submitted to wider stakeholders.

Fully Customisable

Mi Performance can be totally tailored to your exact requirements including branding and specific language.
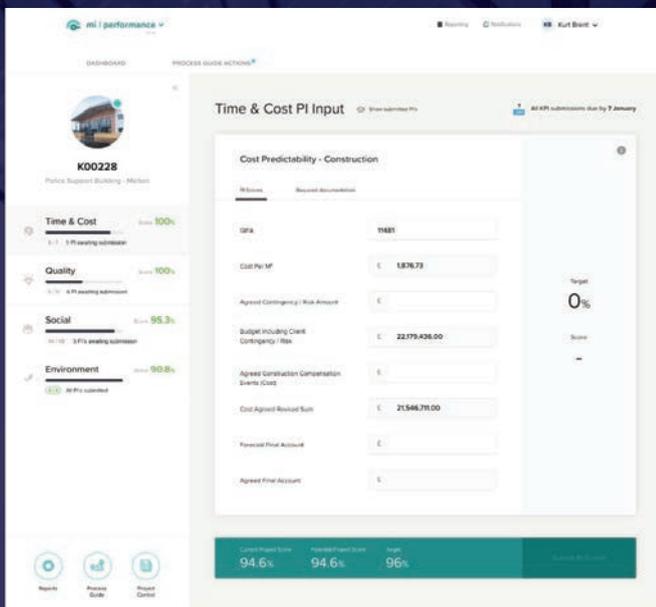

Alerts & Warnings

Users can be prompted via email notifications & pop ups of upcoming or overdue data capture, validation review and submissions.
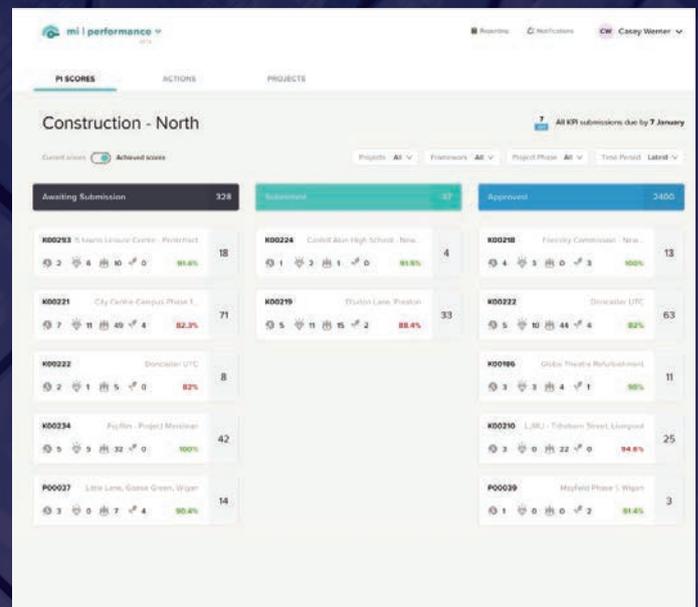

Reporting & Analytics

Not only does the system come with standard reports based on best practice but bespoke scenario based analytics can be produced to highlight actionable opportunities to drive continuous improvement

Permissions

A powerful permissions model ensure users only have access to information they have been given explicit permissions to view or edit.

Mi Performance allows measures to be clearly categorised and captured at key points during project deliver. Measures can be set to either be customer or contractor based- ensuring one solution to meet all requirements.

Our management tools massively reduce any administrative overhead by providing a single interface to track, monitor and report on all submissions. No more email, no more spreadsheet, no more rekeying.
